

## QUALITY AND ENVIRONMENT POLICY

FI 02 - 5 v5

Since 2003, BIOSUD is developing a channel dedicated to environmental sustainable cultivation, storage, processing : rice, cereals, protein crops and legumes :

- Organic product, in accordance to the specifications of the organic farming standard.
- Dietetic rice, following specific guideline and intended mostly for the babyfood industry.

In these domains, BIOSUD's expertise aims to :

- Highlight and develop his channel's productions, exclusively cultivated in Camargue and Provence by guaranteeing reliable and sustainable opportunities.
- Supply high quality products to its customers (raw material or products from the first transformation) following their qualitative and environmental requirements are assuring their traçability and their conformity.
- Strengthen the satisfaction and the fidelity of its customers by the setting up of customers focus approach.
- Give to the consumer the certitude that its products deserve their trust, for their quality and their nutritional safety.

**BIOSUD manages its quality and environment policy through an integrated management system.  
BIOSUD is certified :**

## QUALITY AND ENVIRONMENT POLICY

FI 02 - 5 v5

### BIOSUD is committed to :

- Respect the social laws and ethic.
- Assign the necessary resources so that his teams always belong to the best of their relevance for the achievement of its objectives.
- Training and familiarising employees with their responsibilities in the environmental and food safety domains in order to associate them closely to the approach.
- Reinforce the staff sensibility in the safety and in the protection of the food chain against malicious acts (food defense).

- Following environmentally and specific legislation.
- Implementing measures to ensure the highest of food safety standards through the prevention of contamination of pollutants and continue to improve performance in order to be technically and economically viable.
- Promoting to its suppliers and subcontractor partners the application of the environmental measures and food safety standards defined in its integrated management system.

- Setting up a quality environmental policy :
  - Defined by his Management Environmental System and Food safety
  - Built up on identified priorities, and implementation of actions and controls as part of regular direction reviews.
  - Communicated to the employers through meetings with the management or its representatives and by bill posting of this document Available for the public.

**Cooperation and participation by all are essential.**
